Wee Scotty	<a href="http://www.weescotty.com">www.weescotty.com</a>		weescottycontact@gmail.com					Yes										<p>The design features woven cotton exterior and a knit interior. The cotton and knit combination have certain filtration elements. The knit also provides comfort and an interior pocket. The pocket can be use for an additional filtration element to insert. The insert choice removes and main mask does wash and dry. Things that can be used (trimmed to size) are purchased hepa type filters, paper towel sheet, coffee filter, a regular mask filter, a N 95. Or on its own, of course the added efforts give more protection. The wire is soft and comfortable and bends around the bridge of the nose for added protection. My guess is these masks can provide 60-95% protection depending on the insert. And extends the life of your coveted N 95 or hospital mask. Please use one, have two clean and ready- to- go, one will be in laundry. Rotate cycle after each use.</p>
